

Management Priorities in Eye Care Delivery for Heads of Eye Hospitals

January 15 – 21, 2023

This one-week course provides an overview of principles and practices of management for efficient delivery of eye care services, with particular focus on implementation and measurement tools that heads of hospitals need for evidence-based decision making. It is directly relevant to the issues and challenges that are unique to an eye care provider:

- Reaching out to more patients in your service area
- Bringing in more paying patients
- Keeping a tab on everyday operations
- Making the best use of all your resources
- Creating an enabling environment for your team
- Leading a motivated and dedicated workforce
- Maintaining a focus on quality
- Providing patient centred care
- Designing comprehensive eye care services to meet the community's needs
- Creating a sustainable organisation

Class time is a combination of lectures and case discussions supplemented by reading assignments and exercises. Within and beyond the classroom, you can expect exposure to management practices within the Aravind System, which includes visits to tertiary and secondary care hospitals, vision centers, community centers, and outreach programmes.

Who should attend?

This course is designed for medical and non-medical professionals who are in the senior management and leadership positions of eye hospitals or eye departments. This annual course has trained over 479 heads of eye hospitals from 41 countries in 19 batches.
